

I'm 57

**57 Year Old Concrete Pavement
State Road 1
Washington County, MS**

**Who says you
have to break
the bank
to become
a 57 year old
pavement?**

Concrete pavements are tough, durable and don't break the bank with maintenance and repair costs. In the past, many agencies used to turn to asphalt because of an initial price tag. Due to rising oil prices in the last few years, concrete has now become competitive on initial costs and yet still provides a much longer life span. So instead of spending money every two to four years on maintenance and even more money on resurfacing costs every 8 to 14 years, we could be building new, long lasting concrete roads.

Just ask the taxpayers in your area what they would prefer. More frequent construction coupled with higher maintenance costs or long lasting concrete pavements for about the same initial cost.

Find out more about Concrete Pavement's many benefits by calling:
