

I'm 61

Concrete is a bright idea

61 Year Old Concrete Pavement
US 51
Coldwater, MS

Using concrete pavements is always a bright idea. Concrete pavements are naturally durable and have a much longer life span without the high maintenance costs associated with other types of pavements. Just take a look at the concrete pavement on US 51 in Coldwater, MS located in Tate County. It is 61 years old and has had very little, if any maintenance.

Concrete pavement's surface is also naturally more reflective than asphalt due to its lighter color. Having more light reflectivity allows you to see better at night and can require fewer light poles allowing energy savings. Just another way that concrete can help our environment.

Find out more about Concrete Pavement's many benefits by calling:
