60+ Year Old Concrete Pavement
Old SR 12
in Oktibbeha County, MS

Like a stubborn bulldog, concrete pavements persistently outlast competitive pavement types. Concrete pavement's unmatched durability has allowed many pavements all around Mississippi to outlive even their own designed lifecycle - just like Old SR 12 running through Mississippi State University's Campus in Oktibbeha County, MS. Old SR 12 is over 60 years old and has very little, if any maintenance.

Concrete's long life and minimal maintenance requirements have always made concrete the best long term value, but now with rising asphalt prices, concrete is also competitive on initial price. Avoid the constant maintenance and resurfacing that leads to the average asphalt pavement costing 3 times more than an equivalent concrete pavement. And who knows, with concrete you may just find the extra time and money to build new roads or improve the road network.

Find out more about Concrete Pavement's many benefits by calling:
