

# I'm 44

## Some things are made to withstand the test of time

**44 Year Old Concrete Pavement  
SR 1 in Greenville, MS**

As one of the most durable building materials on earth, concrete has a proven ability to last - sometimes even lasting longer than it's designed life. Just take a look at this section of concrete pavement on State Road 1 in Greenville, MS. It is 44 years old and is still providing a strong, reliable surface to travel on.

The best part is that concrete's long life doesn't come with a high maintenance price tag. Asphalt pavements regular maintenance and resurfacing requirements often cause it to cost up to three times more than a comparable concrete pavement when you look at the life cycle costs. Of course, less maintenance also means fewer orange barrels, fewer lane closures, and less construction related traffic congestion and accidents.

Find out more about Concrete Pavement's many benefits by calling:
