

Lakeland City Hall Parking Expansion

Pervious Concrete Open House

Wednesday, September 8, 2010 - 10:45 a.m. - 12:45 p.m.

Lakeland City Hall

10001 Highway 70 | Lakeland, Tennessee

Parking available on Adagio Lane

Grinder Excavating Co., Inc.

The Lakeland City Hall parking lot expansion project serves city hall, a city park and soccer fields utilizing pervious concrete application that reduces runoff by allowing infiltration into the surface.

Pervious concrete is a mix of coarse aggregate, cement, water, and very little sand. By modeling natural ground cover, pervious concrete is an excellent choice for stormwater management.

Please join us for this project open house where you can see the process in action and obtain more information on pervious concrete and its benefits.

**** Bring your hard hat and safety vest ****

Registration Deadline: By Noon on Tuesday, September 7, 2010

2 PDHs!
